

It's incredible how technology has positively impacted the lives of many. EUROX Vinyl Flooring is one of it.

EUROX Vinyl Flooring is a technologically-driven flooring system that uses various types of layering to ensure brilliant performances and aesthetics.

Benefits That Are Steps Above

More Options Translate To Better Application & Creativity

By remarkably minimising repetition of the printed designs, more options are made available. Thus, accordingly better creativity of its application.

Extended Product Lifespan

EUROX Vinyl Flooring is firmly protected by a specially-engineered 'fibre glass membrane' to ensure minimal expansion and shrinkage. This is significant in maintaining the consistency and durability of the vinyl.

Reliably Safe & Virtually Soundless

Apart from the host of practical features, the prime function of the profile is to soften all the edges which ultimately enhances its' safety level and has better sound absorption.

Waterproof	Termite Proof	Acoustic Insulation	Stain-Resistant
